# Lepide

Exchange

The Lepide Exchange auditing solution enables you to easily audit, monitor and alert on everything that is happening to on-premises or cloud-based Exchange, all from a single platform. Get the critical information you need in a way that's readable, understandable and actionable.

On-Premise and cloud Exchange auditing.

Overcome the limitations of native Exchange auditing through increased visibility into the who, what, where and when audit questions.

Monitor non-owner mailbox access.

Report on when non-owners access specific mailboxes. Find out who accessed the mailbox, when, from where and what activities occurred.

Real time customizable alerts.

Decrease the time it takes for you to spot and react to potentially damaging changes in Exchange through custom real time alerts and Mobile App.

Pre-defined reporting for security and compliance.

Pre-defined reports for common security and compliance concerns, including PCI, HIPAA, GDPR, CCPA, SOX and more.

Spot sensitive data sent over Exchange.

Get real time alerts delivered when sensitive data is sent within or outside the organization via Exchange.

Analyze permissions to mailboxes.

See who has full or partial access to mailboxes and track when permissions change to reduce risk to data.

Audit Exchange mailbox permissions.

Our Exchange auditing tool allows you to audit both current mailbox permissions and mailbox permission changes more effectively. Ensure that only authorized individuals have access to sensitive data, maintain control over user permissions, and mitigate the risk of unauthorized data breaches.

Lepide

Audit Exchange mailbox access and logins.

With our Exchange Auditing solution, you can track and monitor mailbox access by owners and nonowners in real time. Identify any suspicious activity, monitor mailbox logins to ensure data privacy, detect unauthorized access, prevent data breaches, comply with regulatory requirements, and hold individuals accountable for any unauthorized activities or data misuse.

Audit mailbox property changes.

Stay informed about any changes made to mailbox properties with our comprehensive auditing capabilities. Easily track modifications to mailbox settings, attributes, and configurations, ensuring data integrity and accountability within your Exchange Server environment.

Audit server configuration settings.

Ensure the security and stability of your Exchange environment by auditing configuration settings. Track modifications made to server settings, software installations, and system configurations, enabling you to maintain control and prevent any inadvertent security vulnerabilities.

Track mailbox activity.

Get detailed information on mailboxes access by owners, including the operations that the user performed (such as soft deletes, move to delete, create, and update).

Monitor email content.

Our Exchange Server Auditing tool allows you to discover and classify sensitive data, so that you can determine whether sensitive data is being accessed by non-owners or shared outside of the organization.
